

Good to see those of you who could make it yesterday, and we missed the rest of you! Look forward to seeing everyone on November 9<sup>th</sup> @ 3pm on zoom.

Below are some links and notes that were shared.

**Anna McEnery shared:**

- The [2021 BHAC Data Report](#). She notes the 2022 report will be issued by Amanda Tjemsland, Kitsap Public Health, who supports the BHAC's data effort.

**Cherish Cronmiller noted:**

[Legal notice Link](#): JEFFERSON COUNTY PUBLIC NOTICE OF TYPE III LAND USE APPLICATION... AND FINAL STATE ENVIRONMENTAL POLICY ACT (SEPA) THRESHOLD DETERMINATION: MITIGATED DETERMINATION OF NONSIGNIFICANCE (MDNS) AND NOTICE OF PUBLIC HEARING FOR CASWELL-BROWN VILLAGE. [Related Docs Link](#): (This link isn't working now, but it is what was pasted in the chat, and maybe will work as the County's email gets sorted?)

Comments concerning this application should be submitted to the Department by 4:30 PM on August 23, 2023 to Brent A. Butler, Chief Strategy Officer, [bbutler@co.jefferson.wa.us](mailto:bbutler@co.jefferson.wa.us)

**Lisa Rey Thomas shared** Info on the webinar on fentanyl and xylazine set for Wednesday, August 30th at 12:00 PM PT : [Register here](#).

- Presenter: Nicole Rodin, PharmD, MBA

Description: Learn about up-to-date information on Fentanyl and Xylazine, including Risk Mitigation as concerns around these substances grow. Objectives: by the end of this presentation, participants should be able to:

- Describe how addiction works in the body for adults and adolescents
- Explain what illicitly manufactured fentanyl is and how it compares to pharmaceutical fentanyl
- Summarize what xylazine is and how it is used in combination with other illicit substances
- Identify and manage risks related to fentanyl and xylazine

**Dr. Carlbom shared:**

- [Bayesian Statistics](#) Overview
- Learn more about the event and to register for the WA Poison Center's 2023 Overdose Prevention, Harm Reduction and Treatment Series

This event is free, but you must register. There are multiple clinical and public health tracks and multiple sessions dedicated to rural pediatric/adolescent mental health, different recreational exposures as well as navigating vulnerable populations interactions with substance exposure.

Join the Washington Poison Center as we discuss overdose. Through presentations from our own staff and from external experts, we'll explore unintentional and intentional factors that can lead to overdose, how to respond to different overdose situations, how to prevent and reduce harm from overdose, and how to access resources and treatment in the state of Washington. Our goal is to open dialogue, de-stigmatize, and ensure everyone is aware of the help available in our communities.
